

Père Castor 🐻, raconte-nous une histoire (d'OPS)

A scenic coastal landscape featuring a rocky coastline with several white, modern houses built into the rocks overlooking a vibrant blue sea. In the background, a range of green mountains is visible under a clear sky. The overall atmosphere is bright and airy.

I think it's time for another round of this: Everyone, especially senior engineers, share a time you accidentally brought down or deleted prod, why it turned out fine, and how you're still kicking ass in the industry today.

Bonjour un petit sujet pour partager un peu nos mésaventures quotidiennes...
Et se défoncer quand les choses vont mal.

La vm du jour, tout va bien... (note la vm host le node d'un cluster flink qui bizarrement est hs.)

```
top - 12:24:11 up 66 days, 17:34, 1 user, load average: 1688,85, 1011,22, 712,98
Tasks: 1191 total, 1 running, 1188 sleeping, 0 stopped, 2 zombie
%Cpu(s): 0,2 us 0,4 sy, 0,0 ni, 99,4 id, 0,0 wa, 0,0 hi, 0,0 si, 0,0 st
KiB Mem : 16259496 total, 8284772 free, 4928824 used, 3045900 buff/cache
KiB Swap: 4194300 total, 4194212 free, 88 used. 10080532 avail Mem
```

Note 1: En bon 🐱 noir, ça arrive forcément juste le Vendredi avant les vacances.

Note 2: J'ai pas la main sur cette infra, mais je crois que qq chose va pas bien.

Cloudflare Service Issues

Postmortem - Read details

Jun 21, 18:30 UTC

Resolved - This incident has been resolved.

Jun 21, 08:06 UTC

Update - We are still monitoring the result.

Jun 21, 07:51 UTC

Monitoring - A fix has been implemented and we are monitoring the results.

Jun 21, 07:20 UTC

Identified - The issue has been identified and a fix is being implemented.

Jun 21, 06:57 UTC

Investigating - A critical P0 incident was declared at approximately 06:34AM UTC. Connectivity in Cloudflare's network has been disrupted in broad regions.

Customers attempting to reach Cloudflare sites in impacted regions will observe 500 errors. The incident impacts all data plane services in our network.

We will continue updating you when we have more information.

OVHcloud

Dear Customer,

Your following OVHcloud customer account(s) are inactive for more than twenty-four (24) months in our information system.

List of inactive customer account(s):

If you do not take any action within 30 days of receiving this email, we will close your account(s) in accordance with OVHcloud's personal data usage policy.

If you no longer wish to use the account(s) in question, and you no longer need the information associated to them (history, invoices, etc.), you do not need to do anything. The account(s) will be closed automatically.

If you wish to keep one or more of these accounts and continue to access and use them, please log in to the relevant account(s) again via your OVHcloud

Dear Customer,

Earlier today, we have sent you an email by mistake.

Indeed, as part of our ongoing activities to maintain our compliance with GDPR, we are constantly conducting campaigns towards our inactive customers.

Due to a settings issue, you have received this communication. Please disregard it.

We sincerely apologize for the inconvenience.

Kind regards,

OVHcloud team

"query killed during yield: renamed collection 'newsblur.feed_icons' to 'newsblur.system.drop.1624498448i220t-1.feed_icons'"

There is honestly no set of words in that error message that I ever want to see again. What is `drop` doing in that error message? Better go find out.

Logging into the MongoDB machine to check out what state the DB is in and I come across the following...

```
nbset:PRIMARY> show dbs
READ__ME_TO_RECOVER_YOUR_DATA  0.000GB
newsblur                         0.718GB

nbset:PRIMARY> use READ__ME_TO_RECOVER_YOUR_DATA
switched to db READ__ME_TO_RECOVER_YOUR_DATA

nbset:PRIMARY> db.README.find()
{
    "_id" : ObjectId("60d3e112ac48d82047aab95d"),
    "content" : "All your data is backed up. You must pay 0.03 BTC to
XXXXXXXXFTHISGUYXXXXXXX 48 hours for recover it. After 48 hours expiration we
will leaked and exposed all your data. In case of refusal to pay, we will
contact the General Data Protection Regulation, GDPR and notify them that you
store user data in an open form and is not safe. Under the rules of the law,
you face a heavy fine or arrest and your base dump will be dropped from our
server! You can buy bitcoin here, does not take much time to buy
https://localbitcoins.com or https://buy.moonpay.io/ After paying write to me
in the mail with your DB IP: FTHISGUY@recoverme.one and you will receive a link
to download your database dump."
}

Slack

Thursday September 30, 2021

⚠ Incident

Less than 1% of users may be experiencing trouble connecting to Slack

We've confirmed this issue is now resolved. If you're still encountering any issues connecting, please reload Slack using Ctrl + Shift + R (Windows/Linux) / Command + Shift + R (Mac) on desktop, or fully quit and reopen Slack on mobile. If that doesn't help, let us know at feedback@slack.com.

If you tried switching to Google DNS during the course of this issue, you can choose to keep this enabled, or switch back using these steps:

https://developers.google.com/speed/public-dns/docs/using#switch_back_to_your_old_dns_settings

Our sincere apologies for the interruption to your work, and we appreciate you bearing with us in the meantime. We'll be back with a full summary of the issue.

Note: We've adjusted the timestamp of this update to accurately reflect the issue's time of resolution.

Oct 1, 5:49 PM GMT+2

Apologies for the continued trouble. It will take some time for the DNS changes to resolve this issue for everyone. If organization policy permits, and if you are comfortable making this change, switching to Google DNS may improve things in the meantime. Please find guides below:

Capture d'écran du PM 30/09/2021: [Slack Status](#)

DNS workaround

shacky003

Pointing your DNS queries to Google (8.8.8.8) or Cloudflare (1.1.1.1) isn't a solution as the article clearly states that BGP route lists were removed globally for the affected domains. It may have worked temporarily due to stale records, but it isn't a fix, as the BGP routes were removed from all public DNS providers.

If a phone number is erased from all phonebooks, getting another phonebook isn't going to help. The routes have to be refreshed/reloaded from the top down..

Posted on Oct 4, 2021 | 1:46 PM

THERE ARE 40 COMMENTS.

Pixelated

Just change it to 8.8.8.8

Posted on Oct 4, 2021 | 12:08 PM

Tommy_P

Or 1.1.1.1

Cloudflare détecte des changements BGP

Cloudflare rapporte un pic suite à des changements de routage de BGP effectués par Facebook. Immédiatement les utilisateurs ont été incapables de résoudre les URL de Facebook.

15:40
UTC

16:00

Incident débuté chez FB

D'après le Post-Mortem de Facebook
Les serveurs DNS ne propagent plus les BGP si le réseau n'est pas sain (protection)

LDAP

Tous les utilisateurs n'arrivent plus à accéder aux services (Facebook, Instagram, WhatsApp)
Même les employés ne peuvent pas rentrer dans les bureaux avec leurs badges. Documentation/Messagerie interne indisponibles

17:00

Pénétration du DC, modifications manuelles

L'accès était hautement difficile, de plus des mécanismes de protection, empêchent des modifications directes/manuelles

Fin de l'incident

Les dernières erreurs disparaissent
Les utilisateurs arrivent pleinement à utiliser les outils de Meta

5 Oct - 03:00 UTC

Tools to explore BGP Lectures

Julia Evans @bOrk · Oct 5

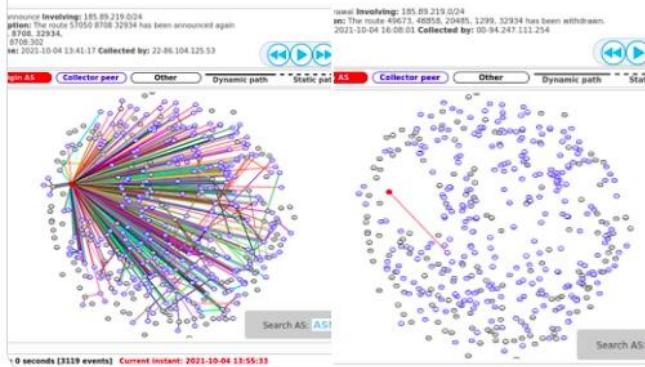

ok I think I understand it better thanks to this tweet! it's much easier to look at the route announcements right before / right after all the routes were deleted because it's a lot less messy

NAYFIELD @Nayfield · Oct 4

Replying to @Nayfield and @JaneLytv

This is connectivity of that network block before and after the configuration change.

Factual summary: The network used to be well connected to the Internet. After a config change, it's not connected. This network contains half of the DNS servers for Facebook and properties.

Cécile @AtaxyaN

Network · Oct 4 Bon, on va faire un petit thread plus technique ou je vais tenter d'expliquer au fur et à mesure que je récupère des infos de vous expliquer ce qui se passe chez Facebook !

(Spoiler alert: je suis pas la plus grande experte du réseau, alors il peut avoir des choses inexactes)

Cécile @AtaxyaN · Oct 4

On peut dire que j'ai franchi un nouveau palier ?
bfmtv.com/tech/facebook-down

demandé, qui prend en réalité la forme d'une suite de chiffres baptisée adresse IP.

"Vers 15h50, Facebook a arrêté d'envoyer ses IPs au reste du monde. En conséquence, les serveurs DNS ne sont plus accessibles par les opérateurs, et donc la traduction du nom de domaine vers l'adresse IP ne peut plus se faire. Ce qui entraîne l'inaccessibilité partout dans le monde des services Facebook (Facebook, Instagram, WhatsApp)" résumé Cécile Morange, technicienne réseau, auprès de BFMTV.

Par analogie, le système de DNS d'Internet peut être assimilé à un GPS

Visualisation de la requête

DNS (TTL=300s)
-> trop court!

Blog Stéphane Bortzmeyer:
[La panne Facebook du 4 octobre 2021](#)

Conséquences

-5% du cours de la bourse
6 Milliards \$ (121.6B)

30x DNS queries @ Cloudflare (1.1.1.1)

A peek at [Down Detector](#) (or your Twitter feed) reveals the problems are widespread. While it's unclear exactly why the platforms are unreachable for so many people, their DNS records show that, [like last week's Slack outage](#), the problem is apparently DNS ([it's always DNS](#)). Cloudflare senior vice president Dane Knecht [notes](#) that Facebook's border gateway protocol routes — [BGP](#) helps networks pick the best path to deliver internet traffic — have been "withdrawn from the internet."

Facebook App @facebookapp

We're aware that some people are having trouble accessing Facebook app. We're working to get things back to normal as quickly as possible, and we apologize for any inconvenience.

6:16 PM · Oct 4, 2021

1 20.5K 2 5.7K ⌂ Copy link to Tweet

[Tweet your reply](#)

[Instagram.com](#) is flashing a 5xx Server Error message, while the Facebook site merely tells us that something went wrong. The problem also appears to be affecting its virtual reality arm, Oculus. Users can load games they already have installed and the browser works, but social features or installing new games does not. The outage is thorough enough that it's affecting Workplace from Facebook customers and, [according to Jane Manchun Wong](#), Facebook's internal sites.

Conséquences latérales

Alexis Kauffmann @framaka · Oct 4

Je ne veux pas en rajouter une couche mais y'a aussi ça.

Tu es seul ce soir au milieu de nulle part car tu n'as pas réussi à ouvrir ton compte Airbnb inscrit avec Facebook Connect...

#facebookdown

...

Sheera Frenkel ✅
@sheeraf

Was just on phone with someone who works for FB who described employees unable to enter buildings this morning to begin to evaluate extent of outage because their badges weren't working to access doors.

1:51 PM · 10/4/21 · Twitter for iPhone

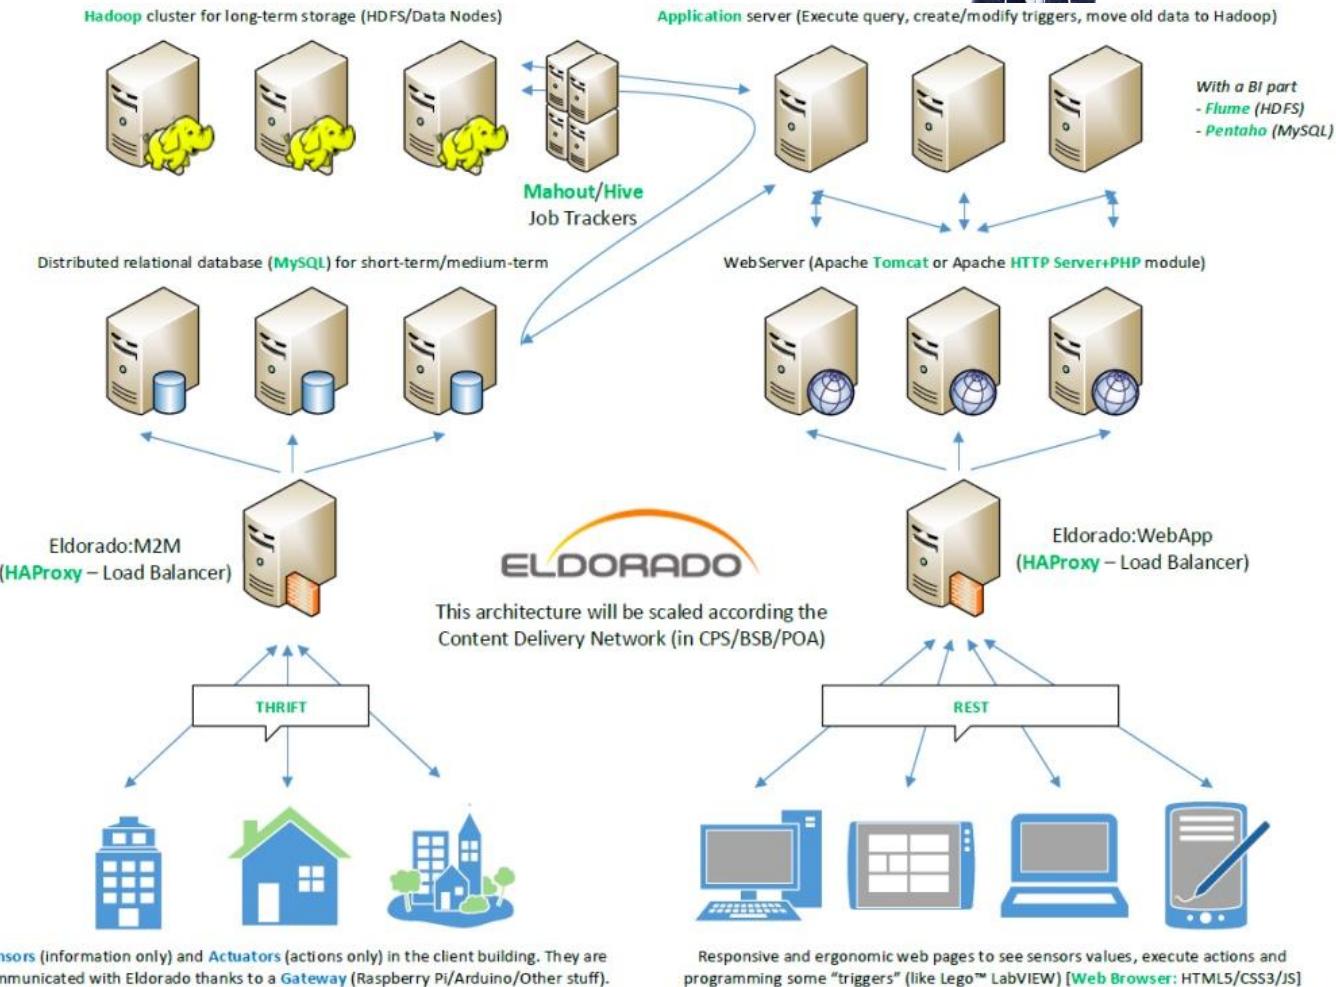

Kevin Collier ✅
@kevincollier

Don't yet know exactly what's behind the DNS issue that's knocked Facebook/Instagram/WhatsApp offline, but it's really bad. Pretty much everything that runs through those three companies are inaccessible. Employees can't even enter conference rooms because they're IoT!

Conseils

Ne pas avoir un même DNS centralisé à tous les produits (SPOF)

Avoir un TTL plus grand (cache)

Avoir des routes de secours (Inbound/out of bound, bastions, PoP chez d'autres cloud providers)

Avoir la documentation (accessible papier/pdf au cas-où, pour réparer le réseau/liste d'IPs)

Ne pas mettre Statuspage au même endroit que l'INFRA, idem pour la messagerie (Messenger ou Slack)

Sinon impossible de communiquer aux clients

Séparation des préoccupations

Ne pas se reposer uniquement sur les logiciels d'audit (code/ops)

Multi-IPs et nom de domaines (au lieu de sous-domaine)

QoS / Prioriser les flux importants de l'entreprise (lot/Web/etc..)

Ne pas changer ses DNS (1.1.1.1) ou (8.8.8.8) de manière permanente

(car ainsi ils ont l'historique de votre navigation web)

Conclusion

En bref

- SRE Blameless culture / With great power comes great responsibility

For more on this, Ding Yuan et al. have a great paper and talk: [Simple Testing Can Prevent Most Critical Failures: An Analysis of Production Failures in Distributed Data-Intensive Systems](#). The paper is basically what it says on the tin. The authors define a critical failure as something that can take down a whole cluster or cause data corruption, and then look at a couple hundred bugs in Cassandra, HBase, MapReduce, and Redis, to find 48 critical failures. They then look at the causes of those failures and find that most bugs were due to bad error handling. 92% of those failures are actually from errors that are handled incorrectly.
