# Slack

## Thursday September 30, 2021

### ⚠ Incident

**Less than 1% of users may be experiencing trouble connecting to Slack**

We've confirmed this issue is now resolved. If you're still encountering any issues connecting, please reload Slack using Ctrl + Shift + R (Windows/Linux) / Command + Shift + R (Mac) on desktop, or fully quit and reopen Slack on mobile. If that doesn't help, let us know at [feedback@slack.com](mailto:feedback@slack.com).

If you tried switching to Google DNS during the course of this issue, you can choose to keep this enabled, or switch back using these steps:

[https://developers.google.com/speed/public-dns/docs/using#switch\\_back\\_to\\_your\\_old\\_dns\\_settings](https://developers.google.com/speed/public-dns/docs/using#switch_back_to_your_old_dns_settings)

Our sincere apologies for the interruption to your work, and we appreciate you bearing with us in the meantime. We'll be back with a full summary of the issue.

Note: We've adjusted the timestamp of this update to accurately reflect the issue's time of resolution.

Oct 1, 5:49 PM GMT+2

Apologies for the continued trouble. It will take some time for the DNS changes to resolve this issue for everyone. If organization policy permits, and if you are comfortable making this change, switching to Google DNS may improve things in the meantime. Please find guides below:

Capture d'écran du PM 30/09/2021: [Slack Status](#)

## DNS workaround

shacky003

Pointing your DNS queries to Google (8.8.8.8) or Cloudflare (1.1.1.1) isn't a solution as the article clearly states that BGP route lists were removed globally for the affected domains. It may have worked temporarily due to stale records, but it isn't a fix, as the BGP routes were removed from all public DNS providers.

If a phone number is erased from all phonebooks, getting another phonebook isn't going to help. The routes have to be refreshed/reloaded from the top down..

Posted on Oct 4, 2021 | 1:46 PM

## Understanding How Facebook Disappeared from the Internet

04/10/2021

Celso Martinho

Tom Strickx

@dadideo

57

Cécile @AtaxyaN

on, on va faire un petit thread plus technique ou je vais tenter d'expliquer au fur et à mesure que je récupère des infos de vous expliquer ce qui se passe chez Facebook !

(Spoiler alert: je suis pas la plus grande experte du réseau, alors il peut avoir des choses inexactes)

Cécile @AtaxyaN

On peut dire que j'ai franchi un nouveau palier ?   
[bfmtv.com/tech/facebook-...](#)

demandé, qui prend en réalité la forme d'une suite de chiffres baptisée adresse IP.

"Vers 15h50, Facebook a arrêté d'envoyer ses IPs au reste du monde. En conséquence, les serveurs DNS ne sont plus accessibles par les opérateurs, et donc la traduction du nom de domaine vers l'adresse IP ne peut plus se faire. Ce qui entraîne l'inaccessibilité partout dans le monde des services Facebook (Facebook, Instagram, WhatsApp)" résumé Cécile Morange, technicienne réseau, auprès de BFMTV.

Par analogie, le système de DNS d'Internet peut être assimilé à un GPS

?

**DNS (TTL=300s)**  
**-> trop court!**

Blog Stéphane Bortzmeyer:  
[La panne Facebook du 4 octobre 2021](#)

## Conséquences

-5% du cours de la bourse  
6 Milliards \$ (121.6B)

30x DNS queries @ Cloudflare (1.1.1.1)

A peek at [Down Detector](#) (or your Twitter feed) reveals the problems are widespread. While it's unclear exactly why the platforms are unreachable for so many people, their DNS records show that, [like last week's Slack outage](#), the problem is apparently DNS ([it's always DNS](#)). Cloudflare senior vice president Dane Knecht [notes](#) that Facebook's border gateway protocol routes — [BGP](#) helps networks pick the best path to deliver internet traffic — have been "withdrawn from the internet."

Facebook App @facebookapp

We're aware that some people are having trouble accessing Facebook app. We're working to get things back to normal as quickly as possible, and we apologize for any inconvenience.

6:16 PM · Oct 4, 2021

1 20.5K 2 5.7K ⌂ Copy link to Tweet

[Tweet your reply](#)

[Instagram.com](#) is flashing a 5xx Server Error message, while the Facebook site merely tells us that something went wrong. The problem also appears to be affecting its virtual reality arm, Oculus. Users can load games they already have installed and the browser works, but social features or installing new games does not. The outage is thorough enough that it's affecting Workplace from Facebook customers and, [according to Jane Manchun Wong](#), Facebook's internal sites.

## Conséquences latérales

Alexis Kauffmann @framaka · Oct 4

Je ne veux pas en rajouter une couche mais y'a aussi ça.

Tu es seul ce soir au milieu de nulle part car tu n'as pas réussi à ouvrir ton compte Airbnb inscrit avec Facebook Connect...

#facebookdown

...

Sheera Frenkel ✅  
@sheerarf

Was just on phone with someone who works for FB who described employees unable to enter buildings this morning to begin to evaluate extent of outage because their badges weren't working to access doors.

1:51 PM · 10/4/21 · Twitter for iPhone

Kevin Collier ✅  
@kevincollier

Don't yet know exactly what's behind the DNS issue that's knocked Facebook/Instagram/WhatsApp offline, but it's really bad. Pretty much everything that runs through those three companies are inaccessible. Employees can't even enter conference rooms because they're IoT!

## Conseils

Ne pas avoir un même DNS centralisé à tous les produits (SPOF)

Avoir un TTL plus grand (cache)

Avoir des routes de secours (Inbound/out of bound, bastions, PoP chez d'autres cloud providers)

Avoir la documentation (accessible papier/pdf au cas où, pour réparer le réseau/liste d'IPs)

Ne pas mettre Statuspage au même endroit que l'INFRA, idem pour la messagerie (Messenger ou Slack)

Sinon impossible de communiquer aux clients

Séparation des préoccupations

Ne pas se reposer uniquement sur les logiciels d'audit (code/ops)

Multi-IPs et nom de domaines (au lieu de sous-domaine)

QoS / Prioriser les flux importants de l'entreprise (lot/Web/etc..)

Ne pas changer ses DNS (1.1.1.1) ou (8.8.8.8) de manière permanente

(car ainsi ils ont l'historique de votre navigation web)

# Blast Effect

## Apache Zookeeper

- Créé en même temps qu'à Hadoop
- Base de beaucoup de systèmes distribués (Kafka v<2.8 / KIP-500)
- Ancêtre de consul/etcd
- Key-Value Store hiérarchique
- Très bons résultats aux tests Jepsen
- Avantages
  - Suivre des changements sur un path (watcher)
  - Noeuds éphémères
  - Notion de sessions

# Architecture

Schéma issu du meetup Toulouse JUG: [War Story, comment les pauses du GC ont pété la prod](#)

## Conseils

Avoir un système d'automatisation des incidents (ouverture d'une war room, d'un document collaboratif, etc.)

Maintenir les versions à jour pour gagner les patch/bug fixes

Mise en place d'un circuit breaker

Règles de Warm-up / Slow startup (mode Diesel)

Ajout d'une liste d'attente (Cloudflare Waiting Room)

Chaos Monkey / Analyse des effets de bord

# NewsBlur

# Attaque ? Pas de sécurisation sur la DEV->PRD

The NewsBlur Blog

Visit NewsBlur >

"query killed during yield: renamed collection 'newsblur.feed\_icons' to 'newsblur.system.drop.1624498448i220t-1.feed\_icons'"

There is honestly no set of words in that error message that I ever want to see again. What is `drop` doing in that error message? Better go find out.

Logging into the MongoDB machine to check out what state the DB is in and I come across the following...

```
nbset:PRIMARY> show dbs
READ__ME_TO_RECOVER_YOUR_DATA  0.000GB
newsblur                         0.718GB

nbset:PRIMARY> use READ__ME_TO_RECOVER_YOUR_DATA
switched to db READ__ME_TO_RECOVER_YOUR_DATA

nbset:PRIMARY> db.README.find()
{
    "_id" : ObjectId("60d3e112ac48d82047aab95d"),
    "content" : "All your data is backed up. You must pay 0.03 BTC to
XXXXXXXXFTHISGUYXXXXXXX 48 hours for recover it. After 48 hours expiration we
will leaked and exposed all your data. In case of refusal to pay, we will
contact the General Data Protection Regulation, GDPR and notify them that you
store user data in an open form and is not safe. Under the rules of the law,
you face a heavy fine or arrest and your base dump will be dropped from our
server! You can buy bitcoin here, does not take much time to buy
https://localbitcoins.com or https://buy.moonpay.io/ After paying write to me
in the mail with your DB IP: FTHISGUY@recoverme.one and you will receive a link
to download your database dump."
}

## [Update] - Mercredi 2 Février 2022

## Retrospective and Technical Details on the recent Firefox Outage

By [Christian Holler](#)

Posted on February 2, 2022 in [Firefox](#)

On January 13th 2022, Firefox became unusable for close to two hours for users worldwide. This incident interrupted many people's workflow. This post highlights the complex series of events and circumstances that, together, triggered a bug deep in the networking code of Firefox.

Retrospective and Technical Details on the recent Firefox Outage ([hacks.mozilla.org](https://hacks.mozilla.org))

## Details

### Summary of June 8 outage

We experienced a global outage due to an undiscovered software bug that surfaced on June 8 when it was triggered by a valid customer configuration change. We detected the disruption within one minute, then identified and isolated the cause, and disabled the configuration. Within 49 minutes, 95% of our network was operating as normal.

This outage was broad and severe, and we're truly sorry for the impact to our customers and everyone who relies on them.

#### What happened?

On May 12, we began a software deployment that introduced a bug that could be triggered by a specific customer configuration under specific circumstances.

Early June 8, a customer pushed a valid configuration change that included the specific circumstances that triggered the bug, which caused 85% of our network to return errors.

## Conseils

Personnaliser les messages d'erreur

Tester les demandes clients (E2E/Staging/Red-Black plate-forme)

Tester les procédures du IT Runbook (Role-play afternoon)

Réponse inconnue => S'arrêter proprement

# Conclusion

## En bref

- SRE Blameless culture / With great power comes great responsibility
- QA / Chaos tests
- Former vos équipes : Game day / Wheel of Misfortune
- Tester fréquemment vos backups & hors d'un Drive pour les données médicaux ;-)
- CI/CD & DevSecOps pipelines
- Implémenter & monitorer les metrics importantes issues des incidents (GC Pause, etc)

Pour aller plus loin

Père Castor 🐻, raconte nous une histoire (d'OPS) (David Aparicio)

The screenshot shows a video player interface. At the top, there's a small video thumbnail of a man speaking at a podium. Below it is a larger thumbnail of a presentation slide. The slide has a dark blue background with the text "Devoxx France 2022 #DevoxxFR #PèreCastor" at the top. In the center, the words "Blast Effect" are written in large, white, sans-serif font. Below the text is a photograph of the Eiffel Tower at sunset, with the Seine River and bridges in the foreground. In the bottom right corner of the slide, there's a small caption "Photo by Chris Kardis on Unsplash". The video player has a red progress bar at the bottom showing "40:13 / 43:56". There are various control icons like play, volume, and settings at the bottom.
